Materials Research Science and Engineering Center

Details:

NSF/DMR
External Link
Limit: 1
Applied: 0

Award Info:

NSF 16-545. Materials Research Science and Engineering Centers (MRSECs) provide sustained support of interdisciplinary materials research and education of the highest quality while addressing fundamental problems in science and engineering. MRSECs address research of a scope and complexity requiring the scale, synergy, and interdisciplinarity provided by a campus-based research center. They support materials research infrastructure in the United States, promote active collaboration between universities and other sectors, including industry and international institutions, and contribute to the development of a national network of university-based centers in materials research, education, and facilities. A MRSEC may be located at a single institution, or may involve multiple institutions in partnership.

William T. Grant Scholars Program 2018

Details:

WTGrant
External Link
Limit: 8
Applied: 0

Award Info:

This career development program supports promising early-career researchers with interests in reducing inequality in youth outcomes and strategies to improve the use of research evidence in ways that benefit youth. PI must have received his/her terminal degree (e.g. Ph.D., M.D.) within seven years of submitting the application. One applicant per major division/school allowed (e.g. ATEC, BBS, EPPS, etc.). Awards are up to $350,000, distributed over five years.

Deadlines:

Internal: Jun 4, 2018
Mallinckrodt Scholar Award 2018

Details:
Mallinckrodt
External Link
Limit: 1
Applied: 0

Award Info:
The mission of the Foundation is to support early stage investigators engaged in basic biomedical research that has the potential to significantly advance the understanding, diagnosis or treatment of disease. PI's should be in their fifth to eighth year of a tenure track faculty position. Universities must be invited to submit one candidate to compete for the Mallinckrodt Scholar Award. The Scholar Award provides $100,000 per year for a period of four years.

Internal: Jun 1, 2018
Sponsor: Aug 1, 2018

ADVANCE: Increasing the Participation and Advancement of Women in Academic Science and Engineering Careers (Adaptation Track) 2019

Details:
NSF
External Link
Limit: 1
Applied: 0

Award Info:
NSF 16-594 (Adaptation Track). Focuses on diversity among women faculty: The ADVANCE program is centrally focused on funding projects to support systemic change for gender equity in STEM academic careers. The Adaptation track supports the adaptation and implementation of proven organizational change strategies or to implement systemic change strategies focused across all STEM disciplines, several STEM disciplines, or within one STEM discipline. Awards up to $1,000,000 for a three year period.

Deadlines:
Sloan Foundation Fellowships 2018

Details:

Sloan

External Link
Limit: 3
Applied: 0

Award Info:

The Sloan Research Fellowships seek to stimulate fundamental research by early-career scientists and scholars of outstanding promise. Limit of 3 candidates per department. Candidates must hold a tenure track (or equivalent) and a Ph.D. awarded on or after Sept. 1, 2012 in chemistry, computational or evolutionary molecular biology, computer science, economics, mathematics, neuroscience, ocean sciences, physics, or a related field. Fellowships are $70,000 for a two-year term, beginning on Sept. 15th of the award year.

Norman Hackerman Award in Chemical Research 2018

Details:

Welch

External Link
Limit: 1
Applied: 0

Award Info:

The Welch Foundation’s Norman Hackerman Award in Chemical Research was established to recognize the accomplishments of chemical scientists in Texas who are in their early careers and to serve as an encouragement to those who are embarking on careers dedicated to increasing our fundamental understanding of chemistry. The award is intended for the personal benefit of the recipient, and carries no requirement for future services as a condition of receiving it. On June 30 for the year nominated, a candidate for the award must be within 10 years of his or her initial appointment as an assistant professor or equivalent, and must have spent the most recent three (3) years ending Sept 30, 2018 doing chemical research in
Texas. The award amount is $100,000.

**NEH Summer Stipends 2018**

Details:

NEH

[External Link](#)

Limit: 2  
Applied: 0

Award Info:

Summer Stipends support individuals pursuing advanced research that is of value to humanities scholars, general audiences, or both. Eligible projects usually result in articles, monographs, books, digital materials
and publications, archaeological site reports, translations, editions, or other scholarly resources. Applicants must have completed their formal education by the application deadline. While applicants need not have advanced degrees, individuals currently enrolled in a degree-granting program are ineligible to apply. Summer Stipends support continuous full-time work on a humanities project for a period of two consecutive months. Summer Stipends provide $6,000 for two consecutive months of research and writing.

**Louis Stokes Alliances for Minority Participation (LSAMP) (Alliances: New, Existing and Pre-Alliance Planning) 2018**

Details:

NSF  
[External Link](#)  
Limit: 1  
Applied: 0

Award Info:

NSF 17-579. Louis Stokes Alliances for Minority Participation (LSAMP) (Alliances: New, Existing and Pre-Alliance Planning). This program assists universities and colleges in their efforts to significantly increase the numbers of students matriculating into and successfully completing high quality degree programs in science, technology, engineering and mathematics (STEM) disciplines in order to diversify the STEM workforce. Alliances are a consortia of multiple degree-granting institutions.

- New and Existing Alliance projects are mainly focused on a particular STEM pathway, e.g., entry into college, first two years, or preparation for entry into graduate studies. Additionally, the project may focus on activities dedicated to diversifying a particular STEM discipline, e.g., production of mathematicians. New and Existing Alliance projects are for a period of five years.
- Pre-Alliance Planning projects undertake planning activities necessary to form new alliances. Recipients of pre-alliance planning grants must commit to submission of an alliance or center proposal following the planning period. Projects are up to 18 months in duration.

Details:

ORAU
External Link
Limit: 2
Applied: 0

Award Info:

The Ralph E. Powe Junior Faculty Enhancement Awards provide seed money for research by junior faculty at ORAU member institutions. These awards are intended to enrich the research and professional growth of young faculty and result in new funding opportunities. Full-time assistant professors at ORAU member institutions within two years of their initial tenure track appointment at the time of application are eligible. The award amount provided by ORAU is $5,000. The applicant’s institution is required to match the award with at least an additional $5,000. This is a one-year grant (June 1 to May 31).

Deadlines:
MRI: Major Research Instrumentation Program 2019

Details:

NSF
External Link
Limit: 3
Applied: 0

Award Info:

NSF 18-513. The program provides organizations with opportunities to acquire major instrumentation that supports the research and research training goals of the organization and that may be used by other researchers regionally or nationally. An MRI proposal may request up to $4 million for either acquisition or development of a research instrument.

Beginning with the FY 2018 competition, each performing organization may submit in revised “Tracks” as defined below, with no more than two submissions in Track 1 and no more than one submission in Track 2.

Track 1 (UTD has 2 submission limit): Track 1 MRI proposals are those that request funds from NSF greater than or equal to $100,000 and less than $1,000,000.
Track 2 (UTD has 1 submission limit): Track 2 MRI proposals are those that request funds from NSF greater than or equal to $1,000,000 up to and including $4,000,000.

Advanced Manufacturing Projects for Emerging Research Exploration - Estimated Deadline

Details:

DOE
EERE’s Advanced Manufacturing Office (AMO) supports a targeted technology portfolio that accelerates research, development, demonstration, and deployment of these emerging technologies. The topic areas are:

**Topic Area 1:** Advanced Materials. The Advanced Materials Topic Area focuses on advances in innovative materials and the devices and systems that incorporate them for energy-saving opportunities and improved functionality.

**Topic Area 2:** Advanced Processes. The Advanced Processes Topic Area focuses on advancing transformational next-generation processes and technologies not bound by limitations of current processes.

**Topic Area 3:** Modeling and Analysis Tools for Materials and Manufacturing. The Modeling and Analysis Tools for Materials and Manufacturing Topic Area focuses on optimization of energy and materials usage across the lifecycle of manufactured products through the use of information technology.

Award Info:

NSF 16-594 (Institutional Transformation Track). The ADVANCE program contributes to the development of a more diverse science and engineering workforce because of the focus on equity for STEM academic faculty who are educating, training, and mentoring undergraduate and graduate students and postdoctoral scholars. This track supports the development of innovative organizational change strategies to produce comprehensive change within the institution across all STEM disciplines. Projects are also expected to contribute new research on gender equity in STEM academics. Awards up to $3,000,000 for a five year period.

NSF Louis Stokes Alliances for Minority Participation (LSAMP) (Bridge to the Doctorate Activity) 2018

Award Info:

NSF 17-579. Louis Stokes Alliances for Minority Participation (LSAMP) (Bridge to the Doctorate Activity). This program assists universities and colleges in their efforts to significantly increase the numbers of students matriculating into and successfully completing high quality degree programs in science, technology, engineering and mathematics (STEM) disciplines in order to diversify the STEM workforce. Alliances are a consortia of multiple degree-granting institutions.

- Bridge to the Doctorate projects are two year projects eligible only to existing alliances funded 10 or more consecutive years. Projects are focused on providing post-baccalaureate fellowship support to a cohort of 12 LSAMP students for the first two years of their STEM graduate studies and providing the necessary academic and research skills that will enable them to successfully earn STEM doctoral degrees and transition into the STEM workforce.

FFAR Fellowship - Professional Development

Details:

FFAR External Link

Award Info:

The FFAR Fellowship Program will fund 48 graduate students over three years using an interdisciplinary approach to career readiness. Students will pursue research projects in an area of food or agriculture research related to FFAR's Challenge Areas and strategic initiatives, such as soil health, plant phenomics, precision agriculture, breeding technology, digital agriculture, and sustainable livestock production. In addition to academic advisors, students will be matched with industry mentors who will provide additional career guidance. Professional Development Funding: $10,000 (due in June)   Research & Professional Development Funding: $50,000 for three years (due in March). Applications for 2019 will be posted in December 2018.
The Rapid Outcomes from Agricultural Research (ROAR) Program

(ROAR) provides nimble deployment of funds to support research and outreach in response to emerging or unanticipated threats to the nation's food supply or agricultural systems. ROAR participants, including but not limited to university researchers, farmers or producers, commodity groups and government officials, may apply for funds prior to an outbreak for development of diagnostics, monitoring and mitigation strategies, or enter into an agreement with FFAR that enables the quick release of funds should an outbreak occur. In this way, the ROAR program supports pre-outbreak efforts, and in the case of an outbreak, fills the gap until traditional, longer-term funding sources can be secured. Up to $150,000 per one-year grant is available from FFAR, with the requirement that recipients provide equal or greater matching funds from non-U.S. federal sources.

Undergraduate Education Program - Science, Engineering and Liberal Arts

Public institutions and research universities must demonstrate a compelling or unique resource to be competitive. Grants range from $200,000 - $1,000,000 Deadlines for Phase I applications are 4:30pm (PT) on May 1 to be considered for the December grant cycle, and 4:30pm (PT) on November 1 to be considered for the June grant cycle. If either date falls on a Saturday or Sunday, the deadline is 4:30pm (PT) the following Monday. Submission of Phase II proposals is by invitation only. The deadlines for invited proposals are 4:30pm (PT) on February 15 for consideration at our June board meeting, and by 4:30 pm (PT) on August 15 for consideration at our December board meeting. If either date falls on a Saturday or Sunday, the
The deadline is 4:30 p.m. (PT) on the following Monday. The Foundation encourages earlier submissions for both Phase I and Phase II. All deadlines are based on Pacific Time.

**Amyotrophic Lateral Sclerosis Research Program**

Details:

DOD

Award Info:

Preposal due: June 22, 2018; application submission is by invitation only. Funding opportunity supports post-discovery, preclinical development of therapeutics for ALS. Preliminary data, including identity and purity of an identified bioactive compound(s), are required. Types of efforts that will be supported include:

- Confirmation of candidate therapeutics obtained from screening or by other means
- Validation of lead pharmacological agents up to IND submission
- Optimization of potency and pharmacology, studies of formulation, stability, and production methods based on Good Manufacturing Practices
- Investigational New Drug (IND)-enabling studies
- Collaboration with industry is encouraged
- Clinical trials are not allowed
- Does not support screening or development of screens or models

Maximum period of performance is 2 years

**(FY 18) Gulf War Illness Research Program - Clinical Trial Award**

Details:

DOD

[External Link](#)

Award Info:

Preapplication due: July 13, 2018 by 5:00pm (ET); an invitation required to submit the full proposal. The FY18 GWIRP Clinical Trial Award supports the rapid implementation of clinical trials with the potential to have a significant impact on GWI. Clinical trials may be designed to evaluate promising new products, pharmacologic agents (drugs or biologics), devices, clinical guidance, and/or emerging approaches and technologies. Proposed projects may range from small proof-of-concept trials to demonstrate feasibility or inform the design of more advanced trials, through large-scale trials to determine efficacy in GWI Veteran populations.

Details:

DOD

[External Link](#)

Award Info:
Pre-application Due: July 13, 2018; The FY18 GWIRP IIFRA supports research to promote new ideas or continued development of applied research in GWI that is aimed at diagnosis or therapeutic advancement. Applications must articulate the pathway to making a clinical impact for Veterans with GWI even if a clinical impact is not an immediate outcome. All applications must focus on Veterans of the 1990-1991 Gulf War affected by GWI. It is the responsibility of the Principal Investigator (PI) to clearly and explicitly articulate the project’s potential impact on GWI.

(FY18) Lung Cancer Research Program- Career Development Award

Details:

DOD
External Link

Award Info:

Pre-Application due: September 6, 2018; submission a full proposal is by invitation only. This award supports early-career, independent investigators to conduct impactful research under the mentorship of an experienced lung cancer researcher. Principal Investigators must be research- or physician-scientists at an early stage of their independent research careers. PIs must be within 5 years of their first faculty appointment (or equivalent) and exhibit a strong desire to pursue a career in lung cancer
(FY18) Lung Cancer Research Program- Concept Paper

Details:

DOD
External Link
Award Info:

Letter of intent (required) due date: July 26, 2018; submission of full proposal is invitation only

The award supports the exploration of a highly innovative new concept or untested theory that addresses an important problem relevant to lung cancer. It allows Principal Investigators the opportunity to pursue serendipitous observations. Applications must describe how the new idea will enhance the existing knowledge of lung cancer or develop an innovative and novel course of investigation. The anticipated direct costs budgeted for the entire period of performance will not exceed $100,000.

Details:

DOD

Award Info:

Preapplication due July 5, 2018; application submission is by invitation only.

- Applications in the following areas are strongly encouraged:
  - Behavioral cognitive, and other non-pharmacological therapies.
  - Pharmacological, genetic, and other biological treatments in ASD.
  - Dissemination/Implementation of clinically validated interventions.
  - Therapies to alleviate conditions co-occurring with ASD (i.e., sleep disturbances, gastrointestinal issues, inflammation, aggression, depression, anxiety, attention deficit, seizures).
  - Interventions promoting success in key transitions to adulthood for individuals living with ASD.
  - Healthcare provider-focused training or tools to improve healthcare delivery for individuals with ASD across the lifespan and the continuum of care (i.e., primary care, urgent/emergent care, and disaster relief).
- Improve diagnosis across the lifespan.
- Cultural and socioeconomic factors in treatment efficacy, delivery, and access to services.
- Preliminary data relevant to the proposed clinical trial are **required**.
